LAYOUT – STEP-BY-STEP (DIAGONAL DESIGN)

This quilt uses a **stair-step diagonal layout**.

Step 1: Build a Corner Base

Start with a 2x2 block:

- Top: Light → Bright

- <https://handcrafted.craftsforlove.com/> SEE THE BEST PATTERNS

- Bottom: Medium → Light

Step 2: Expand Diagonally

Add rows like stairs:

Row 1: 2 blocks

Row 2: 3 blocks

Row 3: 4 blocks

Row 4: 5 blocks

Continue until desired size

Step 3: Color Placement Logic

Follow this pattern:

- Diagonal line = SAME tone family
- Alternate diagonals:
 - Light → Bright → Dark

Example:

Diagonal 1: Light yellow

Diagonal 2: Bright yellow

Diagonal 3: Dark sunflower

Diagonal 4: Mixed/denim

Step 4: Balance Rule

- Never place too many dark blocks together
- Spread bold prints evenly
- Use denim to “rest the eye”
